

News on the Frontline  
by Shomit Sirohi

I. Intifadas in the Arab World - Iraq, Sudan and even Israel, Palestine

And so intifadas are back in fashion - my proof, all the people on radio in Deterior are saying, but equally the meaning of Sirohi - the Prophet, and in fact the Christ as passion among the people which then is also Black power in the world of black people and even Kenya becoming a capitalist country finally - with all of this going on the statistical proof of all of this is the simple Tardean curve which was viral curves of far rights earlier and all their ethics in the media as in politics, to the new Tardean curve of the same viral type becoming Deterior curves, which means a new curve of its news. I mean you can put it in Sirohian language - the changes since the 2020s of American financial booms, and 1990s news, and even finally the new logic of capitalism and state politics with NGOs in India and what is called the recent Congress news and working class news in the Twitter page of Sirohi, is finally proving also Arab intifadas, which is an axis of in fact working class victories in India and black America becoming large cycles of Renaultism mass politics all over the Arab continent - witnessing for the first time architectural cities and even economics and Quran policies with Sirohi on the radio lecturing its truth for the theological people of Israel and Palestine, even Iraq and Iran. From no cities to full cities and even answers to Kabbalism and even spiritual health with God and thought forms.

All of this is news today.

II. From Intifada to Israel - the Promised Land and Healthcare Booms and Life Extension

Now of course the Intifadas sweep through the Arab world and create Arab socialism which then also means in the history of the Arab world which then means Israel is finally free, after a tragic history of formation going wrong because of a lack of whole country nicities which is also though the whole Arab continent - from central banks, to company formation logics and even bureaucracy and laws, and even democratic election statistics to in fact news and mass media, the Arab world now organizes Arab socialism, with in fact Israel getting a hospital from Sirohi worth 40 trillion and offers life extension to its people and all who believe in ethics and co-operation with Israel. Life goes from 50 years to eternity, with Sirohi busy explaining the ABCs of eternal life as a biological nicety called in fact transitive cells and immanence which means also auto-poesis which is being lived by Sirohi, his lovers and all the people of Israel and Quran and Chrisitan monastics, and even some people in Valencia.

III. News as in fact the Campaign in The Resistance - a play by Sirohi

So in fact Trotsky was killed by gestapo, which then in the Resistance becomes the joke of Sirohi's mathematical exactitude that he was killed by a hotel servant who took him to the hospital. The nature of mathematical joking is when the joke reveals a joke structure - like when the CIA is dismissed on the nature of the law as they call it run by power. The jokes go on in Sirohi - that in fact the Green Beret could not form recently because they do not practice it.

Or as the joke goes, Shiv Sena could not be arrested because they believed all of them ran all of Mumbai in overdetermined complexity. While actually as appearance, is demystified to its essence a critique and brought back to its appearance - they are all actually lost in the city. The joke is real because it is the nature of a joke that is reasoned into exactitude because these are exact jokes. Like when Sirohi cannot predict the meeting because the meeting is being cancelled and that then is because they are all planning to meet him later, which is in their daily praxis grid. It is making philosophy linked to practico-dialectical commitments that makes it a praxis style discussion of philosophers - called the aligned movement policy of their mission in Heidegger's sense.

#### IV. From the Resistance to in fact the Simple Tragedy of Modernity - a Story on Albee

When of course the resistance gives way to Sirohi's analysis of Edward Albee's Zoo story, all of life in modernity is a simple tragedy of one man trying to overcome another in absolute which then is tragedy - not the Hegelian phenomenology of Spirit which becomes a sense, tragedy and absolute but an absolute which is tragic - that people do not even have access to bank accounts while meeting the lawyer in the bank called the manager and asking for their rights. Another joke and history of Althusser's style of encounter.
